ML 98-22: Implementation of Single-Family Premium Collection Subsystem-Periodic (SFPCS-P) and Changes in Single-Family Monthly Risk-Based and Section 530 Mortgage Insurance Premium

ML 98-22, Attachment: SFPCS -- Periodic Premium Calculation (5/14/1998)

Currently, HUD allows the lenders to choose from three different premium calculations for risk-based loans. Beginning with the premiums due October 1, 1998, premiums will be based on HUD's calculation. There will be no tolerance in the amount of the premiums.

Below is the premium calculation along with examples and pseudocode to assist in the conversion to the new calculation method.

Premium Calculation

<i>Periodic MIP Computation Steps</i>	<i>Example</i>
Step 1: Compute annual average outstanding balance (see below)	Average Outstanding Balance for 1st amortization year: \$106,160.654166666666
Step 2: Average Outstanding Balance * Annual MIP Rate <i>(round to 2nd decimal place based on value in 3rd decimal place.)</i>	106,160.654166666666 x .005 = 530.803270833333333 <i>round to 530.80</i>
Step 3: If MIP financed, divide annual MIP from Step 2 by (1 + Up-Front MIP factor) <i>Result rounded to 2nd decimal place based on value in 3rd decimal place.</i>	530.80 / (1 + 0.0225) = 519.1198 <i>round to 519.12</i>
Step 4: Divide by 12 and round to nearest cent for Monthly MIP. <i>Result rounded to 2nd decimal place based on value in 3rd decimal place.</i>	519.12 / 12 = 43.26 <i>round to 43.26</i>
Step 5: Multiply by 12. <i>This is the Annual Premium.</i>	\$519.12

Computation of Annual Average Outstanding Balance

To start, use the original loan amount as the previous balance. Repeat the following steps for the remaining months in the year (11 iterations). The calculation of

subsequent years is the same. The second year will begin with the last result of the first year.

- a. Multiply previous balance times annual contract interest rate. *Round the result to two (2) decimal places based on value in 3rd decimal place.*
- b. Divide result by 1200. *Round the result to two (2) decimal places based on the value in 3rd decimal place.*
- c. Add previous balance.
- d. Subtract P&I payment. *Note: For ARMS's use original Interest Rate and original P&I through all years. For GEM/GPM compute current P&I based on amortization plan. See table below.*

When the final year is computed, total up the 12 results for that year and divide the total by 12.

AMPLAN	RATE OF INCREASE	MONTHS OF INCREASE
A	.025	60
B	.050	60
C	.075	60
D	.020	120
E	.030	120
F	.049	120
L	.010	999
M	.020	999
N	.030	999
O	.040	999
P	.050	999

The new monthly P&I for GEM/GPM is not calculated if the twelfth month of the case has not been reached or if the payment number is greater than the maximum number of months.

Premium Calculation Example

<i>Field</i>	<i>Value</i>
Original Mortgage Amount	\$106,605
Interest Rate	7.5
Monthly P&I	745.40
Annual MIP Rate	0.005

Up-Front Factor 0.0225

Beginning Amortization Date 04/1996

Today's Date 12/1997

1. Compute the annual average outstanding balance:

<i>Month/Year</i>	<i>Computation</i>		<i>Result</i>
Year 1/Month 1	(Use Original Mortgage Amount)		\$106,605.00
Year 1/Month 2	a.	$106,605.00 * 7.5 = 799,537.5000$ (round to 799,537.50)	\$106,525.88
	b.	$799,537.50 / 1200 = 666.28125$ (round to 666.28)	
	c.	$666.28 + 106,605.00 = 107,271.28$	
	d.	$107,271.28 - 745.40 = 106,525.88$	
Year 1/Month 3	a.	$106,525.88 * 7.5 = 798,944.1000$ (round to 798,944.10)	\$106,446.27
	b.	$798,944.10 / 1200 = 665.78675$ (round to 665.79)	
	c.	$665.79 + 106,525.88 = 107,191.67$	
	d.	$107,191.67 - 745.40 = 106,446.27$	
Year 1/Month 4	a.	$106,446.27 * 7.5 = 798,347.025$ (round to 798,347.03)	\$106,366.16
	b.	$798,347.03 / 1200 = 665.2891916$ (round to 665.29)	
	c.	$665.29 + 106,446.27 = 107,111.56$	
	d.	$107,111.56 - 745.40 = 106,366.16$	
Year 1/Month 5	a.	$106,366.16 * 7.5 = 797,746.20$ (round to 797,746.20)	\$106,285.55
	b.	$797,746.20 / 1200 = 664.7885$ (round to 664.79)	
	c.	$664.79 + 106,366.16 = 107,030.95$	
	d.	$107,030.95 - 745.40 = 106,285.55$	
Year 1/Month 6	a.	$106,285.55 * 7.5 = 797,141.625$ (round to 797,141.63)	\$106,204.43
	b.	$797,141.63 / 1200 = 664.2847$ (round to 664.28)	
	c.	$664.28 + 106,285.55 = 106,949.83$	
	d.	$106,949.83 - 745.40 = 106,204.43$	

Year 1/Month 7	a.	$106,204.43 * 7.5 = 796,533.225$ (round to 796,533.23)	\$106,122.81
	b.	$796,533.23 / 1200 = 663.77769$ (round to 663.78)	
	c.	$663.78 + 106,204.43 = 106,868.21$	
	d.	$106,868.21 - 745.40 = 106,122.81$	
Year 1/Month 8	a.	$106,122.81 * 7.5 = 795,921.075$ (round to 795,921.08)	\$106,040.68
	b.	$795,921.08 / 1200 = 663.2675666$ (round to 663.27)	
	c.	$663.267 + 106,122.81 =$ 106,786.08	
	d.	$106,786.08 - 745.40 = 106,040.68$	
Year 1/Month 9	a.	$106,040.68 * 7.5 = 795,305.10$ (round to 795,305.10)	\$105,958.03
	b.	$795,305.10 / 1200 = 662.75425$ (round to 662.75)	
	c.	$662.75 + 106,040.68 = 106,703.43$	
	d.	$106,703.43 - 745.40 = 105,958.03$	
Year 1/Month 10	a.	$105,958.03 * 7.5 = 794,685.225$ (round to 794,685.23)	\$105,874.87
	b.	$794,685.23 / 1200 = 662.2376916$ (round to 662.24)	
	c.	$662.234 + 105,958.03 =$ 106,620.27	
	d.	$106,620.27 - 745.40 = 105,874.87$	
Year 1/Month 11	a.	$105,874.87 * 7.5 = 794,061.525$ (round to 794,061.53)	\$105,791.19
	b.	$794,061.53 / 1200 = 661.7179416$ (round to 661.72)	
	c.	$661.72 + 105,874.87 = 106,536.59$	
	d.	$106,536.59 - 745.40 = 105,791.19$	
Year 1/Month 12	a.	$105,791.19 * 7.5 = 793,433.925$ (round to 793,433.93)	\$105,706.98
	b.	$793,433.93 / 1200 = 661.19494$ (round to 661.19)	
	c.	$661.19 + 105,791.19 = 106,452.38$	
	d.	$106,452.38 - 745.40 = 105,706.98$	

Total of the Year 1 results	\$1,273,927.85
Divided by 12 <i>This is the Annual Average Outstanding Balance</i>
